

May 4, 2004

Dear Friend of Lake Oroville State Recreation Area,

As you probably know, State Parks is developing a long-range General Plan for Lake Oroville State Recreation Area, which will be used to guide the park's future management, development, and public use as part of the California State Park System.

The State Parks General Planning Team held a public meeting about the Lake Oroville State Recreation Area General Plan from 7 p.m. to 9 p.m. on Wednesday, April 14 at the Municipal Auditorium in Oroville.

Twenty-four people attended the meeting. After presenting an overview of the general planning process and goals, the planning team recorded public comments on this process and on issues and opportunities for the Lake Oroville State Recreation Area.

Please find attached the transcribed notes from both spoken and written comments provided at the April 14 Public Scoping Meeting. If we missed or improperly recorded any of your comments or if you want to make additional comments, you may send your corrections or additions to me.

Thank you for attending the meeting. I will keep you informed as the plan progresses. You may also watch our planning website at:
